I used this procedure and everything went smoothly without any problems: \$ carthage update \$ carthage bootstrap --platform iOS --configuration Release However, once the library is created in the app I then get an issue with Xcode that says that: (lldb) image lookup -image-id at build/OS-iPhone.build/Release-iphones/Main-Bridging-Header.hmap fatal error: missing file extension for "PlaygroundSupport/PlaygroundPage.playground.swift" Any idea what is going on? A: After some hours of searching I found the problem. The problem was caused by using \$ carthage update because this command runs the "update" script of Carth 570a42141b
